Dear Mustafa,

Thank you very much for your application to Powercoders!
Congratulations, you were selected for the next step of the application process: an **Additional Task**. Based on your submissions, we will decide whether you will be invited to an online Interview Day or not.
Please read through this email carefully and confirm by email (until Friday, 6 January) with a short answer that you've received it.

1. Video / Voice Message of you speaking English

Please record a one minute video of yourself (max. 60 seconds, in English).
Introduce yourself and tell us something you are good at / you are proud of (e.g. a personal achievement / a recent learning).
Label the file/video "FirstnameLastname_Intro" (e.g. LinusMurbach_Intro).

2. Coding / Web Development: Your Portfolio

We expect from our candidates that you have started to learn some fundamental coding / web development skills.
Please follow the [Code Makery tutorial](#) to build your first (or more advanced) website. Complete Parts 1 and 2 - and go beyond if you like by adding more (individual) content, images, etc. Too easy? You already started with CSS on your own time? Style the website you just built in a modern layout and make it ready for 2023.
Send us the link to your portfolio website (hosted on Netlify).
If you don't have a laptop, see whether you can borrow one from a friend. If that's not possible, complete the [SoloLearn course "Intro to HTML"](#) on your phone and send us the certificate instead.

Submission

Submit your answers to both tasks via this [Online Form](#) until latest **Tuesday, 10 January 2023, 8 pm**.
If you have a question or concern, please contact us by answering this email.

Online Interviews will take place on 23, 25, 26, 30 January and 1 February 2023. Once you have submitted your tasks, we will review the submission and let you know as soon as possible whether you're invited to an interview or not.

We look forward to hearing back from you!

Best wishes,
Linus for the Powercoders Team

Linus Murbach
Program Manager
www.powercoders.org

P.S. If you haven't started learning coding on your own, we highly recommend to start now. You can find various learning resources on [our website](#). If coding is completely new to you, we recommend to start with a course about HTML or CSS.

Hi,

I got your message and I accept the tasks. I will send your requests as soon as possible.
I hope you have a good year ahead 🎅🌲🎅.

I present my respect and hi.

This is the link to my own web page.
